Professional summary

Aspiring full-stack developer with **3+ years of experience** (including internship), proficient in building highly scalable APIs using **Laravel** and **MERN stack technologies**, actively enhancing skills in AI and intelligent agent-based systems, and passionate about developing scalable SaaS products and modern web applications.

Work Experience

Fullstack Developer (SDE-1) | Travelthrust | (May 2023 - Dec 2023)

Traveling Package Booking Platform:

- **Overview:** A travel package booking portal with an admin dashboard for building trip packages and managing users.
- **Backend:** Developed REST APIs using Laravel, implemented authentication with Laravel Sanctum, and managed roles and permissions using Spatie Laravel Permission.
- **Database & Performance:** Used MySQL as the database and implemented indexing to improve query performance
- **Security:** Implemented input validation to **prevent SQL injection/XSS**, **enforced RBAC**, secured APIs with authentication, **enabled CSRF protection**, and ensured **HTTPS with secure password hashing**.
- **Collaboration:** Led backend development while mentoring 3 interns, coordinating with UI and QA teams to ensure smooth integration and timely delivery.

Itinerary Builder SaaS Product:

- **Overview:** Built a multi-tenant itinerary builder using **Next.js** and **Redux Toolkit**, featuring a subscription-based model and multi-role permission system.
- **Backend:** Built scalable REST APIs using Node.js, implemented multi-user authentication and authorization, integrated real-time features with **Socket.IO**, and used **LangChain** to generate AI-powered itineraries.
- **Database & Cloud Storage:** Used **PostgreSQL** with indexing, **Redis** for caching, and **Amazon S3** for asset storage.
- **Security:** Implemented **rotation-based access & refresh token** authentication, input validation (SQLi/XSS), RBAC, CSRF protection, and HTTPS with secure password hashing.
- **Collaboration:** Developed backend REST APIs and integrated them with the Next.js frontend using Redux Toolkit.

Decision-Making Tool (Based on the Bhagavad Gita and Vedic wisdom):

- **Overview:** A decision-making platform inspired by the *Bhagavad Gita*, featuring journaling based on thoughts, emotions, and behaviors, an anonymous feedback system, and guided exercises across health, finance, and relationships—providing insights through visual charts.
- **Backend:** Developed REST APIs using **Laravel**, implemented authentication with Laravel Sanctum, and managed roles and permissions using Spatie Laravel Permission.
- **Database & Background Processing:** Utilized **MySQL** as the primary database, improved query performance through effective **indexing** strategies, and implemented **queue jobs** for handling email and **notification systems** to ensure better performance and a non-blocking user experience.
- **Collaboration:** Handled backend development and API integration with the frontend, collaborating closely with one teammate in a two-member team.

Finance portal (Mutual Funds, SIP) :

- **Overview:** A financial management portal for mutual funds and SIPs, integrated with National Stock Exchange of India and Bombay Stock Exchange.
- **Backend:** Developed REST APIs using **Laravel**, implemented authentication with Laravel Sanctum, and managed roles and permissions using Spatie Laravel Permission. Handled integration with NSE and BSE APIs by **processing XML** responses and converting them into JSON format for seamless platform integration.
- **Database & Performance:** Used MySQL as the database and implemented indexing to improve query performance.
- **Collaboration:** Designed and developed both frontend and backend, handling API integration while collaborating with one teammate in a two-member team.

Skills

- **Programming Languages:** JAVASCRIPT | PHP | PYTHON
- **Web Technologies:** HTML | CSS | JavaScript | JQuery | NodeJS
- **Frameworks / Libraries:** ReactJs| NextJS | Laravel | Redux Tool Kit
- **Databases:** MySQL | MongoDB | Postgres | Redis
- **AI Building:** LangChain | LLMs | AI Agents | n8n automation
- **Cloud & AWS:** CI/CD Pipeline | AWS | EC2 | S3 | Hostinger | Vercel
- **Tools:** Git | GitHub | Docker | Jenkins | VS Code | Antigravity

Education

Bachelor of Computer Application (BCA) | Lucknow University, Lucknow | 2020 - 2023

XII (UP Board) | K.P.S.A.G.I.C Atiya Majhigawan Hardoi Uttar Pradesh | 2016 - 2017

X (UP Board) | K.P.S.A.G.I.C Atiya Majhigawan Hardoi Uttar Pradesh | 2014 - 2015
